📍 Rue des Manchots 13b, 6280
Gerpennes, Belgium

Birthdate: 27th January 2004

SKILLS

- Object-Oriented Programming: Java and Python
- Procedural programming: C
- Embedded systems
- Linux/Windows
- Automation
- Basic electronics
- Web back-end: Node.js
- Project management

STRENGTH

- Autonomous
- Competitive
- Perseverance

HOBBIES

- Programming
- Simulation or rhythm video games
- Watching video content

SOFTWARE

- Visual Studio Code
- JetBrains Code Suite
- GitHub
- Code Blocks
- Eclipse
- TIA Portal / Unity Pro XL
- Docker

LANGUAGES

- English B2
- French (mother tongue)

SUMMARY STATEMENT

I am a student currently in the final year of my Bachelor's program in computer science and systems: industrial computing. I am interested in new technologies such as AI, web and software development, industry 4.0, automation and the use of XR in the industry.

EXPERIENCE

TECH GOES WILD HACKATHON

MIC - Meet Innovate Create March 22-24 2024

We created a custom chatbot named LENNY, written in Python. I used the LangChain and Gradio frameworks for the chatbot customization and the user interface. Our team of six students secured third place from a jury of industry leaders in technology, including Microsoft and Proximus.

WORLDSKILLS BELGIUM PRE-SELECTION

WORLDSKILLS BELGIUM March 16 2024

Test on skills like automation, networking, database and industry 4.0.

EDUCATION

Haute École Louvain en Hainaut (Belgium) 2022-Present

Bachelor in computer science and systems: industrial computing
(University college)

UMONS (Belgium) 2021-2022
